Experiences

Hydra Games | Fullstack developer Jan 2022 - Today

- Leadership in the development of a distributed gambling web application using React, Next, TypeScript, and NestJs.
- Close collaboration with designers, backend developers, and project managers to ensure high-quality delivery.
- Implementation of advanced features and integration with external services.

MBLabs | Fullstack developer Jan 2020 - Jan 2022

- Active participation in the development of multiple projects, collaborating with multidisciplinary teams.
- Code review, maintenance of existing projects.
- Troubleshooting and development of robust interfaces using React, Next, TypeScript, Node, Angular, and Java.

StrongWay | Fullstack developer Jan 2018 - Jan 2020

- Implementation of advanced features and customization of e-commerce templates across various CMSs using React, Vue, Angular and Node.
- Code reviews and ensuring code quality.

Projects

2023 **Dogs**

This project consists of a social network inspired by Instagram, designed specifically for dogs. Users can log in and add photos.

2022 **PickPallet**

This project is a clone of ColorHunt. Both apps have the same intentions.

2021 **CV19Tracker**

This project consumes a Brazilian API that provides real-time data on the coronavirus situation in Brazil and worldwide.
